Summary

Senior Front-End Developer with 4+ years of hands-on experience building production-grade web platforms using React, Next.js, and TypeScript. Specialized in architecting scalable frontend systems, designing reusable component libraries, and delivering high-performance applications across cybersecurity and e-commerce domains. Proven record leading cross-functional development teams, owning end-to-end frontend architecture, and shipping complex features under real-world constraints — with a consistent focus on clean code, maintainability, and exceptional user experience.

Experience

JUN '2025' – PRESENT

Senior Front-End Developer | Falcon Focus (Remotely) - Saudi Arabia

- **Falcon Focus Dashboard (Internal)**

Falcon Focus is a cybersecurity management platform designed to monitor and control employee internet access through integrated firewall systems and endpoint agents. The platform enables organizations to define granular network access policies, automatically detect violations based on real-time agent and firewall signals, and provide administrators with a centralized dashboard to manage devices, review violations, and monitor compliance.

- Architected and developed the full frontend platform using Next.js and TypeScript, building scalable modules for device agents, firewall rules, violation tracking, and administrative management.
- Designed and implemented a complex visual workflow feature similar to Isoflow, isolating its internal state and logic using custom Zustand providers to ensure seamless integration without impacting the main application architecture.
- Built secure management interfaces for firewall policies, agent management, and automated violation tracking, enabling administrators to monitor network activity and enforce security policies.
- Implemented a fully localized enterprise interface using next-intl, translating complex cybersecurity terminology and ensuring a consistent multilingual user experience.
- Containerized the frontend production environment using Docker and configured an Nginx reverse proxy with SSL, gaining hands-on experience deploying and serving the application in a production-ready infrastructure.
- Developed reusable UI components and interactive dashboards using Tailwind CSS, Radix UI, and ECharts, enabling dynamic visualization of security and network data.
- Built to scale, with future extensibility for audit logging, notification systems, and plug-in support.

- **[Falcon Focus](#) (Corporate Website)**

- Architected and developed a modern corporate website using **Next.js (App Router) and react**, providing a scalable structure for multi-page content such as Platform, Solutions, and Resources.

- Built a reusable UI component system using **Tailwind CSS, Radix UI, and Class Variance Authority (CVA)** to ensure design consistency, accessibility, and maintainability.
- Implemented **dark/light theme switching** using next-themes with a flicker-free experience across server and client rendering.
- Developed interactive user experiences with **scroll-triggered animations and dynamic UI components**, improving engagement and visual feedback.
- Integrated **form validation and submission workflows** using Formik and Yup, ensuring reliable client-side validation and structured user input handling.
- Implemented an **email notification system** using Resend and React Email to generate and send dynamic HTML emails from React components.

OCT '2023' – JUN '2025'

Senior Front-End Developer | Tot Platform (On-Site) - Egypt

- [Alkhabaz](#) version 2 (E-Commerce Web App)

- Analysed and reviewed the design and business requirements for version 2 of the website to ensure alignment between development efforts and business objectives.
- Broke down the website stages and tasks into the smallest components to create a clear time plan and an efficient task allocation strategy.
- Led and mentored a team of four developers to create the website which works in a different user experience through mobile and desktop devices within a challenging time frame.
- Worked on redirect user routing based on his operating system (user-agent).
- Developed a pre-order cart feature, allowing users to select a delivery date for out-of-stock items, enhancing customer experience and sales retention.

- [G-Mobile](#) (E-Commerce)

- Collaborated in designing and implementing an e-commerce platform tailored for mobile-first users, ensuring a responsive and engaging experience across all devices.
- Integrated a dynamic product catalog with filtering, search, and category navigation optimized for performance and accessibility.
- Developed promotional features such as time-limited deals and coupon support to increase user engagement and sales.
- Implemented a secure checkout process with multiple payment methods and real-time order tracking to improve user trust and conversion rates.
- Optimized loading performance and asset delivery for low-bandwidth mobile users, leading to faster interactions and better Core Web Vitals scores.

- [TUBEX](#) (Corporate Website)

- Supervised the project from requirement gathering to planning, execution, and delivery, ensuring alignment with business goals of an informative corporate website, effectively showcasing the company's industry achievements, products, and services.
- Implemented key functionalities, including an SMTP-based contact form and file download capability, ensuring seamless user interaction.

- **Fawry installments & bnpl**
 - Collaborated on building a promotional landing page to highlight exclusive Black Friday deals and discounts.
 - Ensured a user-friendly interface and seamlessly enhanced the customer experience.
 - Focused on performance optimization and responsive design to cater to a wide range of users across web and mobile platforms.
- **[Sparkle](#) (Company Website)**
 - Oversaw the entire project lifecycle—from gathering client requirements to planning, execution, and final delivery—ensuring alignment with business objectives.
 - Led the design and development of a comprehensive, user-focused website, strengthening brand presence and improving client engagement.
- **Storyboard**
 - MDX-based documentation for detailed explanations, usage guidelines, and best practices.
 - Showcasing all component variants with real-time previews and controls for customization.
 - Consistent design system integration ensuring reusability and maintainability across projects.
- **[Alkhabaz](#) (E-Commerce Web App)**
 - Developed a fully functional e-commerce platform for a bakery brand, handling product, order, and user management.
 - Worked on making hooks and context providers for managing user authentication, cart, and checkout logic.
 - Secure payment integration with QNB gateway.
 - Implemented a multi-fulfillment center system, optimizing order processing by routing shipments to the nearest available center.
- **[Himash](#)**
 - Crafted a modern platform for furniture retail, featuring an intuitive UI/UX.
 - Implemented masonry layout-based products listing for a smooth user experience.
- **[Alshafak](#)**
 - developed an informative website for Al Shafak, providing a well-structured, user-friendly interface to showcase the brand's services and offerings.
 - Ensured a responsive design, fast loading speed, and an engaging content layout for an optimal user experience.

JAN '2022' – OCT '2023'

React Developer | Active 4 Web (On-Site) - Egypt

- Delivered responsive, performant interfaces using React, improving Core Web Vitals scores and cross-device experience for production applications.
- Developed reusable components to facilitate faster development timelines and improve overall code quality.
- Improved SEO performance through structured HTML semantics, meta tags, and semantic markup best practices, contributing to measurable gains in organic page visibility.
- Migrated legacy codebases to modern React patterns (hooks, context, functional components), reducing bundle size and improving maintainability.

Easy CLI (Package)

- Developed the Easy CLI package, an optimized tool designed for React and Vue component creation.
- Automated the generation and management of components, significantly streamlining development workflows.
- Enabled developers to write clean, efficient code more quickly, improving productivity and ensuring high-quality output.
- Focused on making the package easy to use, with clear documentation and a user-friendly interface.
- Published and maintained the package on NPM, allowing developers to easily integrate it into their projects.

Skills

Core	HTML5 - CSS3 - Sass - Bootstrap - Tailwind - JavaScript - TypeScript
Frameworks	React - Next.js
State Management	Zustand - Redux Toolkit - Redux Query - React Query
Forms & Validation	Formik - React Hook Form - Yup – Zod
UI & Design System	Shadcn/ui - Radix UI – Storybook
Internationalisation	I18next - next-intl
Tooling & DevOps	Git / GitHub - GitHub Actions - Docker - NPM pkg

Education

Al-Azhar University - Faculty of Sharia and Law - Cairo, Egypt
